# Couchbase and Rails

Sergey Avseyev sergey@couchbase.com @avsej

# Couchbase

# What is Couchbase

# **Easy Scalability**

Grow cluster without application changes, without downtime

# **Consistent High Performance**

Sub-millisecond read/write response & high throughput

# Always On 24x365

No downtime for software upgrades, hardware maintenance, etc

# Flexible Data Model

JSON document model with no fixed schema

# gem i couchbase

### **Basic K/V Operations**

```
Couchbase.bucket.incr("user:#{id}:hits", :initial => 1)
Couchbase.bucket.set("user:#{id}:ip", "192.0.43.10")
Couchbase.bucket.get("user:#{id}:token", :ttl => 1.day)
```

#### Rails Cache Store

#### **Rails Session Store**

# gem i couchbase-model

### **Generate Configuration**

# config/couchbase.yml

```
common: &common
  node_list:
    - example.com:8091
    - example.org:8091
    - example.net:8091
  username:
  password:
development:
  <<: *common
  bucket: example_development
production:
  <<: *common
  bucket: example_test
```

### Modeling

```
class Beer < Couchbase::Model</pre>
  attribute :name
  attribute :abv, :default => 0
  attribute :ibu. :default => 0
  attribute :category
  belongs to :brewery
  view :all, :limit => 31
  before save do |doc|
    doc.abv = doc.abv.to_f
    doc.ibu = doc.ibu.to f
  end
end
```

#### **Views: Generator**

#### Views: Map

Find average Alcohol by Volume (ABV) for each category

```
function(doc, meta) {
  if (doc.type == "beer" && doc.category && doc.abv > 0) {
    emit(doc.category, doc.abv);
  }
}
```

## Views: Reduce. The Hard Way

```
function (keys, values, rereduce) {
  var ret = {sum: 0, count: 0};
  if (rereduce) {
    for (var i = 0; i < values.length; ++i) {</pre>
      ret.sum += values[i].sum;
      ret.count += values[i].count;
  } else {
    ret.sum = sum(values);
    ret.count = values.length;
  ret.avg = ret.sum / ret.count;
  return ret;
```

#### Views: Reduce. Built-in reducers

# Native Built-in Reducers

http://www.couchbase.com/docs/couchbase-devguide-2.0/using-built-in-reduces.html
